SUMMARY

Frontend Developer specializing in React and Next.js, with hands-on experience shipping responsive, API-integrated interfaces and interactive 3D animated web experiences. Comfortable working in TypeScript across component-driven codebases. Focused on clean and reusable UI and measurable performance.

EDUCATION

Universitas Bina Sarana Informatika

Kota Bekasi, Indonesia

BS in Information Systems (GPA: 3.55)

Expected 2027

WORK EXPERIENCE

Social Economic Accelerator Lab

Malang, East Java, Indonesia (Remote)

Frontend Developer Intern

Mar 2026 – Jul 2026

- Sole frontend developer on a 3-person team building Knowledge Hub, a social feed feature. Translated UI/UX designs into responsive interfaces and integrated REST APIs with the backend.
- Implemented CRUD functionality for posts and comments, supporting 4+ posts processed during testing/development, with image and PDF upload handling files up to 20MB.
- Developed real-time like/unlike interaction with optimistic UI updates, integrated with REST APIs for instant feedback without page reload.
- Fixed responsive layout and cross-browser inconsistencies in the Knowledge Hub interface, improving usability across mobile and desktop breakpoints.

PROJECTS

iPhone 15 Pro – Website Clone

Personal Project

Frontend Developer

May 2025

- Built a fully responsive, interactive iPhone 15 Pro webpage replica featuring a 3D model with real-time lighting and animation, attracting 500+ demo views within the first month.
- Implemented advanced 3D rendering using Three.js with optimized textures and assets, achieving smooth performance across 90%+ of modern browsers.
- Created immersive scroll-based animations with GSAP, mimicking Apple's product transitions at 60 FPS, using React and Tailwind CSS for a modular, mobile-first build.

Ecovest – Waste Bank Website

2nd Place Winner

Sole Frontend Developer

Nov 2025 – Dec 2025

- Responsible for 100% UI implementation across 10+ responsive pages, from company profile to admin dashboard interfaces, using Next.js and React.
- Developed 20+ clean, reusable React components with mobile-first responsiveness, collaborating with a UI/UX designer and content researcher on a 3-person team.
- Deployed and maintained the project on Vercel for live demo and competition judging.
